**DETAILED ACTION**

***Response to Amendment***

1. Applicant's response to the office action filed on November 15, 2005 has been entered. The claims pending in this application are claims 1-28 and 61-73 wherein claims 5, 6, 8, and 12 have been withdrawn due to species election. Rejection and/or objection not reiterated from the previous office action are hereby withdrawn in view of the amendments filed on November 15, 2005.

***Election/Restrictions***

2. After reviewing newly added claims 61-73, the examiner notes that the claims are directed to the following patentably distinct species of the claimed invention:
- (1) the capture beads and reporter beads are mixed off the disc and the magnetic field is applied to the mixture of the sample and the beads off the disc (claim 63)
  - (2) the capture beads, reporter beads, and sample are mixed together and then a magnetic field is applied after the mixing (claim 64)
  - (3) the capture beads and sample are mixed together, a magnetic field is applied to form a first isolate, and then the first isolate is mixed with the reporter beads and a magnetic field is applied to form the isolate (claim 65).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 1-4, 7, 9-11, 13-28, 61, 62, and 66-73.

Art Unit: 1634

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

3. The claims are also directed to the following patentably distinct species of the claimed invention:

- (4) detecting light reflected from the capture field (claim 66)
- (5) detecting light transmitted past the capture field to a detector (claim 67)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 1-4, 7, 9-11, 13-28, 61-65, and 68-73.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 1634

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. The claims are also directed to the following patentably distinct species of the claimed invention:

(6) a first capture agent and a second capture agent are in the different capture field (claim 72)

(7) a first capture agent and a second capture agent are in the same capture field (claim 73)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 1-4, 7, 9-11, 13-28, and 61-71.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of
